RELISH · INTERNATIONAL VEG CUISINE

RELISH

the cinematic QR menu experience

Turn your menu into a cinematic, AI-guided experience — and your floor into a data-driven operation. Live in days. Priced for India.

A printed menu is a missed opportunity.

The status quo costs you, every cover

Static printed menus can't show the dish. Specials change but reprints lag. Guests wait for a waiter to ask a question. And at the end of the night, you have no data on what sold, when, or why. Relish fixes all four — on the phone already in your guest's hand.

THE RELISH EXPERIENCE — FIVE PILLARS

01

Cinematic guest experience

Seven designer themes, a GSAP hero film, and per-dish video. Guests feel the brand before the first bite.

02

AI that upsells for you

A mood / budget / party-size recommender suggests the right dishes and raises average check — with zero staff effort.

03

Tablesides service, digitized

Call waiter, request water, split the bill, add gratuity, see Jain & allergy info — fewer wait-times, happier tables.

04

A back-office that pays for itself

Live floor map, full menu control, and real analytics: peak hours, top items, category mix, staff performance.

05

Premium, but priced for India

One all-in fee from ₹15,000, then a yearly renewal. No POS rip-out, no app to download. Your guests just scan.

Two products, one platform.

A guest-facing menu your customers love, and an operations console your staff runs the floor with.

Guest QR App

- ◆ 7 landing & hero themes (classic to editorial)
- ◆ Full menu booklet with category navigation
- ◆ Item detail sheets — photo, pairings, customizations
- ◆ AI recommendation flow (mood · party · budget)
- ◆ Cart & order review
- ◆ Service panel: waiter, water, split bill, gratuity
- ◆ Jain / veg / allergy & spice labelling
- ◆ Per-dish & per-screen cinematic video
- ◆ 3 switchable visual themes, mobile-first
- ◆ Works on any phone — no app download

Staff Operations Console

- ◆ Admin dashboard — revenue, orders, avg check, turns
- ◆ Charts: revenue trend, top items, category mix
- ◆ Peak-hour heatmap & busiest-tables table
- ◆ Manager floor plan — 16 tables, 4 zones, live status
- ◆ Menu manager — full CRUD, sold-out toggles
- ◆ Staff performance — orders & avg per waiter
- ◆ Waiter views — my tables, service queue, billing
- ◆ Print-ready receipts & order history
- ◆ Role-based access: admin · manager · waiter
- ◆ Reports centre with date-range filtering

Live from day one: the full guest menu and the staff dashboard on your device. Cloud sync across devices, real-time order push, multi-location, POS integration and single sign-on roll out during onboarding or on Enterprise — your account manager confirms exactly what's live for your plan.

ONE FEE. EVERYTHING INCLUDED.

Already have photos or videos?

We build around your media and take the saving straight off your one-time fee.

— ₹3,000 photos · —
₹5,000 video

All prices exclusive of 18% GST. One fee covers the entire build — design, menu, photos & video, QR codes, setup and training. The small annual renewal simply keeps your menu hosted, supported and updated. Multi-location & chains: custom quote. 14-day pilot available.

Cinematic video, included.

AI-generated cinematic film for your hero, your categories, your signature dishes — baked into one price, never billed per clip. No one else in India does this. It's what makes a Relish menu unforgettable.

Hero film

Included

your signature opening

Category
ambience

Included

every section, alive

Signature dishes

Included

your stars, in motion

Service moments

Included

waiter · water · bread

How your video gets made	What it costs you
We generate the cinematic AI video for your menu — the slow, multi-pass, expensive part, handled end-to-end by us	Included in your one-time fee
You provide your own dish photos	–₹3,000 off the one-time fee
You provide your own ready videos	–₹5,000 off the one-time fee

Network-smart, always

Every clip ships in three bitrates and auto-selects by the guest's connection — crisp on 4G, light on 2G, still-image fallback on data-saver. Beautiful never means slow.

There is no per-clip or per-screen bill, ever — video is produced once and hosted for you under the annual renewal. Bring your own media and we pass the saving straight back.

Live in four steps.

1

Share your menu

Send us your current menu. We digitize, tag dietary info, and set your theme.

2

Approve the look

Pick a theme, approve any cinematic video screens you've added.

3

Place your QR

We send print-ready QR table tents. Guests scan — no app needed.

4

Run the floor

Your team logs into the console. Orders, tables, and analytics, live.

The ROI math

- ♦ Visual menus lift order value 8–15% industry-wide
- ♦ AI recommend upsells with zero staff effort
- ♦ Faster tables via the service queue & floor map
- ♦ Zero reprint cost — change the menu in seconds
- ♦ Renewal is nominal — roughly a reprinted menu set a year

Why now

- ♦ QR-menu adoption is now the norm, not the novelty
- ♦ Guests expect to scan, browse, and order from the table
- ♦ Only Relish makes the menu cinematic & AI-guided
- ♦ India-priced — a fraction of global QR-menu SaaS
- ♦ No POS to replace — Relish layers on what you have

Give your menu a standing ovation.

Book a 15-minute demo — see your own dishes, cinematic.
