

Pricing & Unit Economics

the business case behind the brochure

Market — India (₹ INR) · FX basis ₹86 / USD

Scale frame — 50–500 restaurants

All sticker prices exclusive of 18% GST

Prepared 2026 · Internal / investor use

CONFIDENTIAL

Grounded in 2025–26 hosting, payment & competitor data. Sources cited throughout. View-volume is the single biggest swing factor and is modelled, not measured.

Money in the build. Recurring in the renewal.

Relish charges a single all-inclusive **one-time fee** to design, build and launch the menu — including the costly, multi-pass AI video generation. The **annual renewal** (₹2,999-4,999/yr) keeps the menu hosted, supported and updated — and because cost-to-serve is tiny, it carries a high margin and builds a real recurring revenue base on top of the build. Charging one number plus a yearly renewal, not a stack of line items, is what makes it pitchable.

The wedge: no competitor in India bundles cinematic / AI-generated video into a clean one-time price. Relish absorbs the expensive part (video that rarely lands in one pass) and gives only a small discount when the restaurant supplies its own media — so a bring-your-own-video build is actually our **highest-margin job**.

Cost-to-serve per restaurant / year

Renewal sits far above this line — the recurring stream is high-margin.

Package	Hosting + infra	Video egress	Support alloc.	Total / restaurant / yr
Web Menu — static site, no dashboard	₹120	₹0	₹280	~₹400
Classic — image menu + console	₹200	₹0	₹500	~₹700
Cinematic — R2 / Bunny video	₹300	₹120	₹600	~₹1,020
Signature — heavy video	₹400	₹250	₹700	~₹1,350

Cost structure.

Cloud hosting (monthly) — non-video infra is near-free at our scale

Provider / tier	INR / mo	What you get
Cloudflare Pages (Free)	₹0	Unlimited static bandwidth, 500 builds/mo
Cloudflare Workers (Paid)	₹430	10M requests for the small backend/API
Supabase Pro	₹2,150	8 GB DB, 100 GB storage, auth, 100K MAU
Hostinger India VPS (alt)	₹599+	INR-native root NVMe VPS
Whole-platform fixed cost	≈ ₹2,580	CF Pages + Workers + Supabase, all restaurants

Video streaming — the only variable that matters

Worked example: ~10 clips/restaurant, ~20 GB egress/month.

Provider	Egress price	Cost / restaurant / mo
Cloudflare R2	\$0 / GB (free egress)	~₹0
Bunny Stream / CDN	\$0.005 / GB	~₹9
Mux (per-minute)	\$0.0008 / min (720p)	~₹114
Cloudflare Stream (per-minute)	\$1 / 1,000 min delivered	~₹144
AWS CloudFront (India edge)	\$0.109 / GB	~₹187

Strategy: serve short looping menu clips from **Cloudflare R2 (free egress)** or Bunny. Avoid per-minute models (Stream/Mux) and the India CloudFront edge as view counts grow. Veo-3 generation is a **one-time** ~₹260–520/clip, recovered by the ₹1,999 production fee.

What we charge, and what we keep.

Packages (per location, ex-GST)

Package	One-time	Renewal / yr	Video	Segment
Web Menu	₹15,000	₹2,999	None · no dashboard	Menu-only website, no backend
Classic	₹24,999	₹2,999	None (images)	Café / QSR + staff console
Cinematic ★	₹54,999	₹4,999	AI video menu	Casual & premium dining
Signature	₹89,999	₹4,999	Full cinematic	Fine-dining / flagship

Build economics — Cinematic package

Line	INR (one-time)
Go-live fee	₹54,999
COGS — AI video generation (Higgsfield / Veo, multi-pass)	-₹20,000
COGS — images, setup, QR, training	-₹5,000
Build gross profit	₹29,999 · ~55%

Bring-your-own-media discount

Client provides	Off one-time
Dish photos (we skip image work)	-₹3,000
Ready videos (we skip costly AI gen)	-₹5,000
Both	-₹7,000

Discount stays small while we save ~₹20k of gen cost — so BYO-video is margin-accretive, and the client still feels rewarded.

Other revenue lines: multi-location / chain quotes, bespoke custom theme (₹9,999–24,999), annual video refresh, additional language packs. Setup, photography and QR tents are folded into the one-time fee.

Renewal economics (recurring)

Renewal / yr	Cost/yr	Margin
Web Menu ₹2,999	₹400	~87%
Classic ₹2,999	₹700	~77%
Cinematic ₹4,999	₹1,020	~80%
Signature ₹4,999	₹1,350	~73%

High-margin recurring on top of the build — hosting, support and updates cost little to deliver.

The numbers that move the model.

Payment & GST mechanics

Item	Rate	Effect
Razorpay domestic (UPI/card/netbanking)	2% + 18% GST on fee	≈ 2.36% effective off the top
GST on the build & renewal	18%	Added on top; ₹54,999 build → ₹64,899 to customer
GST registration threshold (services)	₹20 lakh turnover	Mandatory above; collect & remit

Competitor benchmark (India)

Product	Model	INR / mo	Note
Petpooja (POS + QR)	Annual	₹625–833	The price anchor customers compare to
DotPe	Per-transaction	variable	No fixed fee; payments-led
MENU TIGER	SaaS (USD)	₹3,268–10,234	International pure-QR SaaS
myDigiMenu	SaaS (USD)	₹3,354+	No free tier in India

Competitors sell **monthly SaaS** (Petpooja ₹625–833/mo; global players ₹3,300–10,000/mo). Relish sells a **one-time build + nominal annual renewal** — a different, easier-to-say-yes-to shape, premium on the build (justified by cinematic + video + AI) and almost free to keep. And Relish is **alone in bundling cinematic video into one price**.

Sensitivity — the levers to watch

Input	Base	Why it matters
AI-video gen passes / clip	~5–10	The biggest COGS swing on the build — Higgsfield/Veo rarely lands first try
BYO-media take rate	—	Cuts our COGS as much as the quote; protects build margin
FX rate (INR/USD)	₹86	Moves every USD-priced gen & hosting line
Video host	R2 / Bunny	₹0 vs ₹187 per restaurant — the renewal cost lever
